Chapter 1

Introduction

I introduce a sample of how to write a thesis [1].

1.1 Sample

The followings are samples. I assume an n -dimensional hypersphere shown in Eq. (1.1). In case of $n = 3$, the shape is like in Figure 1.1.

$$r^2 = \sum_{k=1}^n x_k^2 \tag{1.1}$$

Figure 1.1: A sphere where $n = 3$.

According to Table 1.1, it has four elements (a, b, c, d) .

Table 1.1: Elements

a	b
c	d

Chapter 2

Conclusion

The conclusion should be concise and comprehensive.

Appendix A

Proof of Theorem 1

Appendices can be added.

Acknowledgment

Thank you.
